Detailed Action

Drawings

The Examiner accepts the drawings filed on December 16, 1998.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 15-25 drawn to browsing products using competitor information, classified in class 705, subclass 27.
- II. Claims 11-14, drawn to e-store dynamic page file comprising query instructions, script components, and hyperlink creation instructions, classified in class 707, subclass 3.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as query instructions, script components, and hyperlink creation instructions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Douglas Muehlhauser on September 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Examiner was not able to reach Mr. Muehlhauser.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
